PROFESSIONAL SUMMARY

Final-year B.Tech (Artificial Intelligence & Data Science) student with hands-on experience in data analytics, business intelligence, dashboard development, SQL, Python, Excel, Power BI, Tableau, and machine learning. Skilled in data cleaning, exploratory data analysis (EDA), data visualization, statistical analysis, DAX, and business reporting. Completed industry-recognized virtual internships and built end-to-end analytics projects. Seeking a Data Analyst role to transform business data into actionable insights.

CORE SKILLS

Python • SQL • Advanced Excel • Power BI • Tableau • Pandas • NumPy • Matplotlib • Seaborn • MySQL • PostgreSQL • SQL Server • Data Cleaning • EDA • Dashboard Development • DAX • Pivot Tables • Data Visualization • Statistical Analysis • Business Intelligence • Git/GitHub

EDUCATION

B.Tech, Artificial Intelligence & Data Science – IIMT College of Engineering, Greater Noida

CGPA: 7.5 | Expected Graduation: 2027

PROJECTS

- **Ecommerce Sales Analysis Dashboard (Power BI):** Designed and deployed an interactive Power BI dashboard to track employee attrition, workforce demographics, and performance KPIs, using DAX-driven measures and dynamic filters to give HR leadership real-time visibility into workforce trends.
- **Swiggy Order Data Analysis (Excel):** Built an end-to-end sales performance dashboard in Excel using Pivot Tables, Pivot Charts, and slicers to analyze order volume, ratings, and regional trends, enabling faster identification of high- and low-performing regions.
- **Fraud Detection in Financial Transactions (Python):** Developed a machine learning model in Scikit-learn to flag fraudulent financial transactions, applying feature engineering and evaluating performance using Precision, Recall, and F1-score to balance detection accuracy against false positives.
- **PhonePe Analytics Dashboard (Power BI):** Developed an interactive Power BI dashboard analyzing transaction trends, user behavior, and payment performance, with DAX-based KPIs and slicers that translated raw transaction data into actionable business insights.
- **Data Warehouse (SQL):** Architected a SQL-based data warehouse with ETL pipelines and dimensional modeling to consolidate data from multiple sources into a single reporting layer, streamlining analytical queries for business reporting.

VIRTUAL INTERNSHIPS

- Deloitte Australia – Data Analytics Job Simulation : Built Tableau dashboard and analyzed fraud indicators.
- Quantum – Data Analytics Job Simulation : Performed customer segmentation and retail transaction analysis.
- Tata Group – Data Visualization : Developed business dashboards and communicated analytical insights.

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- IBM Data Analysis with Python
- IBM Excel Basics for Data Analysis
- Cisco Data Analytics Essentials

ACHIEVEMENTS

- Represented the department and college at an international Alumni Meet in Dubai, demonstrating leadership, communication, and stakeholder engagement.
